PROFESSIONAL SUMMARY

Results-driven Data Analyst with 1+ year of experience at Hitachi Payment Services, specializing in MIS automation, KPI dashboards, and SQL-based reporting. Reduced reporting turnaround by 60% and saved ₹5–8 lakhs/month in operational costs through automation. Proficient in Power BI, Advanced SQL, Python, and Excel. Adept at turning raw data into actionable insights that drive business decisions.

PROFESSIONAL EXPERIENCE

Data Analyst – DBU Operations | Hitachi Payment Services Pvt Ltd

Mar 2025 – Present

Domain: Payments & Banking Operations | Tools: SQL Server, Power BI, Advanced Excel, Google Sheets App Script

- Automated KPI dashboards and MIS reports using SQL, Power BI, and Excel — improving reporting efficiency by 50%
- Automated SQL Stored Procedures and built a Python-based ETL pipeline using SQLAlchemy to import data from Excel into SQL Server, reducing manual effort and improving time efficiency by 70%, while also cutting reporting turnaround time by 60%
- Automated distance calculation using Google Sheets App Script, eliminating ₹5–8 lakhs/month in operational costs
- Performed data extraction and aggregation using Advanced SQL (Joins, CTEs, Window Functions) for structured daily/monthly reporting
- Built scalable MIS frameworks and performance trackers to support cross-functional business monitoring
- Conducted root cause analysis on operational data to identify inefficiencies and recommend process improvements
- Ensured data accuracy across multiple reports through validation and quality checks, collaborating with operations and finance teams

PROJECTS

Gold Price Prediction – ML Model | Python, Scikit-learn, Gradio

Feb 2025

- Analyzed 10+ years of historical gold price and USD-INR exchange data using Pandas and NumPy; identified 30% correlation between exchange rates and gold price movements via EDA
- Built a Linear Regression model achieving 85–90% prediction accuracy; deployed an interactive Gradio interface for real-time predictions based on USD-INR inputs

Airbnb Data Analysis | Python, Pandas, Matplotlib, Seaborn

Jan 2025

- Performed EDA on 40,000+ Airbnb listings, identifying 25% price variation across locations and key demand patterns
- Created interactive visualizations of host behaviour and market trends, improving insight clarity by 30%

Excel to SQL Automation Pipeline | Python, Macros, SQLAlchemy

May 2026

- Built an automated data pipeline using Python and SQL Server
- Consolidated multiple Excel sheets using VBA macros
- Transferred and transformed Excel data into SQL database using Python
- Automated execution of SQL Stored Procedures for data processing
- Improved workflow efficiency by reducing manual data handling

TECHNICAL SKILLS

Databases & SQL: MySQL, SQL Server, Advanced SQL (Joins, CTEs, Window Functions, Stored Procedures)

Visualization & BI: Power BI, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP, INDEX-MATCH, Power Query, VBA)

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SQLAlchemy)

Analytics: MIS Reporting, KPI Tracking, Data Cleaning, EDA, Statistical Analysis, Hypothesis Testing

Productivity: Google Sheets (App Script), Data Validation, Dashboard Development

SOFT SKILLS

- Attention to Detail & Data Accuracy
- Analytical Thinking & Data Interpretation
- Stakeholder Communication & Reporting
- Problem-Solving & Root Cause Analysis
- Time Management & Deadline Adherence
- Ownership & Accountability
- Cross-functional Collaboration
- Stakeholder Management (Technical & Non-Technical)

EDUCATION

B.E. in Computer Science Engineering

Graduated: 2024

Bannari Amman Institute of Technology | CGPA: 8.01/10

CERTIFICATIONS

- Python for Data Science & Analysis – IBM (Jan 2025)
- Data Analytics Job Simulation – Deloitte (Jan 2025)
- Data Analytics & Visualization Job Simulation – Accenture (Feb 2025)
- Masters Program in Data Analytics & Science – IT Vedant (Mar 2025)
